Art Unit: 1745

## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-32 drawn to a single cell, a cell plate comprising the single cell, and a
    fuel cell comprising the single cell or cell plate, classified in class 429, subclass
    40.
  - II. Claims 33-35, drawn to a method of making a single cell, classified in class 427, subclass 115.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the single cell can be produced by a different process such as sputtering the cathode layer or anode layer instead of printing or spraying as recited in the process claims.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/046,918

Art Unit: 1745

## Species Election

- 4. This application contains claims directed to the following patentably distinct species of the claimed invention:
  - 1) First species drawn to an embodiment of the single cell comprising an air electrode which comprises a cathode layer and an electricity conducting cathode layer.
  - a) If this embodiment is elected, applicant is also required to elect a single species for the cathode layer selected from the group consisting of silver and bismuth oxide.
  - b) Finally, if this embodiment is elected, applicant is also required to elect a single species for the electricity collecting cathode layer selected from the group consisting of silver, platinum, gold, titanium, tungsten, lanthanum, strontium, cobalt, iron, manganese, chromium, La<sub>0.3</sub>Co<sub>0.7</sub>O<sub>3</sub>, La<sub>0.7</sub>Sr<sub>0.3</sub>CrO<sub>3</sub>, La<sub>0.7</sub>Sr<sub>0.3</sub>FeO<sub>3</sub>, La<sub>0.7</sub>Sr<sub>0.3</sub>MnO<sub>3</sub>, and La<sub>0.7</sub>Sr<sub>0.3</sub>CrO<sub>3</sub>.
  - 2) Second species drawn to an embodiment of the single cell comprising a fuel electrode which comprises an anode layer and an electricity collecting anode layer.
  - a) If this embodiment is elected, applicant is also required to elect a single species for the anode layer selected from the group consisting of nickel, nickel-chromium alloy, nickel-iron alloy, and nickel oxide.

b) Finally, if this embodiment is elected, applicant is also required to elect a single species for the electricity collecting anode layer selected from the group consisting of nickel, nickel-chromium alloy, nickel-iron alloy, and nickel oxide.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 10/046,918

Art Unit: 1745

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 7. Any inquiry concerning this communication or earlier communications should be directed to examiner Susy Tsang-Foster, Ph.D. whose telephone number is (703) 305-0588. The examiner can normally be reached on Monday through Friday from 9:30 AM to 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached at (703) 308-2383. The phone number for the organization where this application or proceeding is assigned is (703) 305-5900.

The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
